

Day Two 21st June 2023

8:00am: Registration Opens

Visit us at the registration desk to pick up your badge – this is your ticket to the full conference

8:55am- 9:00am: Chairman's Introduction

Segun Lanade, *Logistics Supervisor, Shell*

Section Three: Production Enhancement

9:00pm – 9:30am: Production Optimization in Deepwater Assets; A case for Open Water Well Intervention

- Hear why we should choose open water intervention for your upcoming well intervention workovers due to its economic & productive efficiency
- Explore rigless well intervention techniques such as performing scale squeeze and acid stimulation from an LCV
- Analyze the subsurface and operational risk to see how precautions can be taken to mitigate risk in upcoming campaigns

Albert Amewolah, *Subsea Operations Engineer, Tullow Oil Ghana*

9:30am – 10:30am: Panel Discussion – Production Enhancement Techniques

- Understand the intervention methods that are currently being employed to increase production efficiency and how risk can be mitigated when approaching these techniques
- Discuss the role new technology plays in West Africa production enhancement and the necessary steps required to introduce new tooling to the oilfield
- Engage with the industry's view of Wax, Water & Sand management and have your questions answered in this Q&A session

Moderator: John Swatson, *Senior Sales Manager, Baker Hughes*

Patrick Nwafor, *Process & Production Engineer, AMNI International*

Oluseye Ogunsina, *Manager, WRFM & PT Development, FIRST E&P Development Company*

Ali Jama, *Head of Production Enhancement, Sub-Saharan Africa, SLB*

10:30am – 11:00am: Coffee Networking Break

Grab some refreshments in the technology showcase hall

11:00am – 11:30am: Field proven technology, delivering production enhancement solutions

- Gain an overview of Hunting's technology and service offerings enabling production optimization to see how they could fit into your upcoming campaigns
- Hear case study examples of technology application and benefits
- Explore broader portfolio offering for West Africa and globally

Jason Mills Lamptey, *Assistant Project Manager*, **Hunting Subsea Technologies**

11:30am – 12:00pm: Well Access and Well Recovery Through Wireline Interventions

- Gain an overview of instances where a downhole fish or obstruction can prevent access to a well and prevent operations from continuing to understand the substantial challenge this poses
- Understand how new advances in e-line interventions tools allow for these obstructions to be safely and efficiently removed to either recover a well or provide access for subsequent interventions operations
- Access case stories that involve electric line fishing operations and preceding/subsequent powered mechanical interventions solutions that enable well access and recovery to view real world results

Roy Kristiansen, *CEO Autentik*, **Welltec**

12:00pm- 12:30pm: Baker Hughes improving the value of Production Enhancement

- Learn about Baker Hughes capabilities providing Well Access and Well Services in West Africa and Globally
- Hear case studies where Baker Hughes have supported operators to realise substantial improvements in production
- Explore Baker Hughes latest technologies providing lower cost, higher value plug and abandonment solutions

Ryan McGregor, *Oilfield Equipment Execution Leader*, **Baker Hughes**

Osaze Ighodaro, *Region Product Line Sales and Commercial Manager - Pressure Pumping*, **Baker Hughes**

12:30pm – 1:00pm: EOR: Maximize Oil Recovery and Reduce CO2 Emissions

- See how the challenge of recovering additional oil from mature fields has necessitated the need for the development of advanced techniques to recover oil beyond the primary and secondary mechanisms
- Identify how the Enhanced Oil Recovery (EOR) technique is especially effective and capable of recovering residual oil in the reservoir as well as extending the life of current oilfields
- Discover how EOR is an important asset for decarbonisation of oil and gas industry through the removal of greenhouse gases emissions and storing them in geological formation or using them for other sectors of industries including oil production optimisation

Dr. Geraldo Ramos PhD, *Reservoir Engineer Specialist, Director of Test and Instrumentation*, **Sonangol**

1:00pm – 1:30pm: Innovative Solutions for Brownfield Well Integrity

- Learn how Kenyon leverages innovative technologies to solve your well integrity problems on Brownfield assets
- Review how Kenyon's approach can be utilized for your upcoming campaigns
- Analyze how these solutions have been utilized by clients for success on their previous projects

Victor Ekpenyong, *CEO, Kenyon International West Africa Co. Ltd*

1:30pm – 1:35pm: Chairman Closing Remarks

Segun Lanade, *Logistics Supervisor, Shell*

1:35pm Lunch Break

Grab some lunch and refreshments in the technology showcase hall
